

## IHSA courses on safety at heights

# Working at Heights— Fundamentals of Fall Prevention

*“I believe that this program has the potential to become the ‘gold standard’ for basic fall-prevention training in this province.”*

– Peter Fonseca, Ontario’s Minister of Labour

If your workers face fall hazards, you’re required to provide them with fall-protection training. Taught by IHSA experts, this full-day program explains the essentials of fall protection in the construction, electrical & utilities, and transportation industries. The course involves classroom instruction and hands-on exposure to some common equipment.

It replaces IHSA’s previous four-hour *Basics of Fall Protection* course and training kit. (Employers still have to provide application- and equipment-specific training.)

Price: \$100 for members\*, \$320 for non-members.

## Suspended Access Equipment

Taught by IHSA experts, this three-day program teaches participants how to recognize, select, and install

- suspended access equipment
- support systems
- fall protection.

It’s the right course for workers and supervisors who rig and install such equipment.

Price: \$150 for members\*, \$960 for non-members.

Courses are already filling up. Register by calling  
**1-800-781-2726** or visit [www.ihsa.ca](http://www.ihsa.ca)

\* You’re automatically a member if you or your company pays WSIB premiums in one of the rate groups covering the construction, transportation, electrical, utilities, aggregates, natural-gas-pipelines, or ready-mix-concrete industries.
