

New course required for COR™ Internal Auditors

As of **January 1, 2016**, COR™ Internal Auditors will have to take an additional course on ***Introduction to Hazard and Risk Management***.

This new course will provide valuable tools and resources for successfully completing the requirements of Element 2 of the COR™ Audit Tool on hazard and risk assessment, evaluation, and controls. This course must be completed before submitting an internal audit to IHSA. Current Internal Auditors will be phased in during their next COR™ cycle.
