## IHSA now offering **Introduction to Hazard and Risk Management**

IHSA's newest course can help anyone who is developing or improving their organization's hazard and risk management system.

Through exercises and case studies, the *Introduction to Hazard and Risk Management* course presents techniques for setting up, evaluating, and maintaining a successful hazard and risk management system, as well as for explaining it to your employees.

This course will be of special interest to organizations that are becoming COR™ certified. It will let you put your hazard assessment process to the test and see how it measures up against the COR™ standard.

You'll learn about

- occupational health and safety management systems
- hazard and risk management models
- hazard identification and risk assessment
- controlling hazards
- communicating and monitoring.

This course is ideal for management, supervisors, or COR™ Internal Auditors who are currently developing, updating, or evaluating their organization's hazard and risk management system or are interested in doing so in the future. It's an excellent way to learn more about how to prepare your organization for a hazard assessment and how to be sure you are prepared for COR™.

Visit [ihsa.ca/training](http://ihsa.ca/training) today to learn how you can book this course. IHSA offers training where and when you need it. Contact us to find out how we can best meet your needs.
