

**WINTER
READY**

When winter comes
will you be ready?

Be Winter Ready

Be aware and be prepared for winter driving conditions. Check out our latest news, events, and resources for tips and information on how you can make sure you're winter ready.

Adjust to winter
road conditions

Drive slow, be cautious for ice and cars around you, and always remember when you see a snow plow's flashing blue light - slow down and let the plow lead the way.

Always have
a winter
emergency kit

It will help in the event that your car breaks down or driving conditions cause you to pull over.

Invest in
winter tires

Installing four winter tires of the same size, type, and tread pattern will improve traction and stability on icy or snow-covered roads.

Service
your car

Do this at the beginning of the winter season to ensure your vehicle is prepared for winter conditions.

Our Partners

**WINTER
READY**

“We owe it to each other
as fellow Ontarians to
make our commutes safe
and arrive **home to our
families** every day”
